New Process Removes Superfluous Hair Roots!

Women troubled with unsightly hairy growths will be delighted to hear that they can now actually remove the hair entirely—roots and all—easily, quickly, harmlessly! It is done without the use of liquid, powder, paste or electric needles.

The new phaeolite process is not to be compared at all with any other method. Nothing like it ever discovered. It causes the hair roots to come out before your very eyes, leaving the skin smooth and hairless as a babe's. Its action is so positive, so certain, druggists generally report phenomenal sales for phaeolite. It is non-odoriferous, non-irritating and a most economical child could safely eat it. Get a small stick of phaeolite today, follow the simple instructions and you will be wonderfully surprised.

The Easiest Way To End Dandruff

There is one sure way that never fails to remove dandruff completely and that is to dissolve it. This destroys it entirely. To do this, just get about four ounces of plain ordinary liquid arvon; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips.

By morning most, if not all, of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you may have.

You will find, too, that all itching and itching of the scalp will stop instantly, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better.

You can get liquid arvon at any drug store. It is inexpensive, and four ounces is all you will need. This simple remedy has never been known to fail.

"Oriole"

(Formerly Gander Brand)

What Can Be More Healthful and Nutritious?

Made exclusively from the very choicest sun-ripened cotton seed that grows, and by a scientific process of refining that preserves the rich, rare nutrient that only a Southern soil and sunshine can produce in King Cotton's choice kernels.

After selecting the very finest seed, produced by the nation's fairest crop, it is scientifically reduced to a smooth-flowing oil, which, when refined to an ideal perfection of purity and consistency, is hermetically sealed in airless cans in which no sealing lead can ever come in contact with the oil.

It comes to you in the same perfect condition in which it is from the refinery.

ORIOLE gives perfect satisfaction in all recipes calling for butter or better substitutes—Oriole is cheaper than butter—going farther.

For Frying As a Salad Oil

It has no equal because you get the real flavor of the food as Oriole is absolutely neutral. It has no odor or flavor to impart to the food it is used in. It is the most economical way to serve fruits, cold vegetables, bits of fish and meat that would otherwise be wasted. Mayonnaise or salad dressing made of Oriole salad oil, added to the leftover dishes, makes them appetizing and nutritious.

Phoenix "The Ideal Shortening"

Phoenix, the Ideal Shortening, has long since been adopted as a staple commodity in thousands of homes—occupying a permanent position in the pantry—specified in all the cooking recipes of the particular housewife—recognized as a pure, nutritious, healthful and economical shortening.

Phoenix is cheaper than lard, as one-third less is required for the same purpose.

During this course the recreational work, including gymnasium work, outdoor games, and mass games with community singing will be under the direction of Miss Annie Tait Jenkins, of Crystal Springs.

COLDWATER, Miss.—The baseball season is over here and the local team has been disbanded. The Coldwater team played 14 games this year, of which they won 5, lost 6 and tied 1. They did not lose a single game on the home grounds.
